The screenshot shows the OSF project interface. At the top, there is a navigation bar with the project title 'Theoretical arguments from Biology in f...' and several menu items: Files, Wiki, Analytics, Registrations, Contributors, Add-ons, and Settings. Below the navigation bar, the project title is displayed in large text. To the right of the title, there are three buttons: 'Make Private', 'Public', and 'P 0', along with a three-dot menu icon. Below the title, there is a section for contributors: 'Contributors: Bertrand Beffara, Benjamin Guinet, Inès Adrar'. Below that, the creation and update dates are shown: 'Date created: 2019-09-23 11:08 PM | Last Updated: 2020-02-16 09:30 PM'. There is also a 'Create DOI' link. The category is listed as 'Project' with a folder icon. The description and license sections are currently empty, with prompts to 'Add a brief description to your project' and 'Add a license'.

Registration creates a frozen version of the project. Your original project remains editable and will have the registration linked.

Things to know about registration:

- Registrations cannot be edited or deleted.
- Withdrawing a registration removes its contents, but leaves behind basic metadata: title, contributors, date registered, date withdrawn, and justification (if provided).
- Registrations can be public or embargoed for up to four years. Embargoed registrations will be made public automatically when the embargo expires.

Continue your registration by selecting a registration form:
